**DETAILED ACTION**

Receipt is acknowledged of the request for reconsideration filed 01/29/2007.

The rejection under 35 USC 103(a) is hereby withdrawn.

After a supplemental search, the following rejections are made:

***Claim Rejections - 35 USC § 112***

Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for biodegradable, non-bursting, non-spherical microstructures which have a size and shape that is sufficiently large to prevent dispersion of the microstructure from one or more selected implant loci, while also providing the necessary surface geometry to provide a relatively constant rate of release of the drug by surface erosion to the desired in situ site, does not reasonably provide enablement for all non-spherical microstructures. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

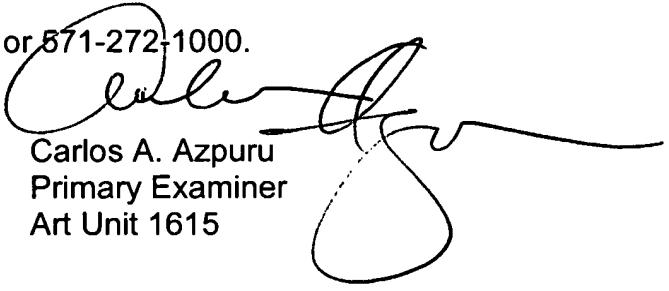

The specification is clear that the claimed microstructures should be both biodegradable and non-bursting (see page 6, line 6; page 9, lines 4-5). The criticality of the size and shape is discussed at page 6, lines 13-17. Appropriate correction is requested.

Addition of these limitations to the claims would place them in condition for allowance.
